Pengantar

I. Memulai

1 Pengenalan

1.1 Synopsis

1.2 Selamat datang di FreeBSD!

1.3 Mengenai Proyek FreeBSD

2 Installing FreeBSD

```
2.1 Synopsis
2.2 Hardware Requirements
2.3 Pre-installation Tasks
2.4 Starting the Installation
2.5 Introducing Sysinstall
2.6 Allocating Disk Space
2.7 Choosing What to Install
2.8 Choosing Your Installation Media
2.9 Committing to the Installation
2.10 Post-installation
2.11 Troubleshooting
2.12 Advanced Installation Guide
2.13 Preparing Your Own Installation Media
```

3 UNIX Basics

```
3.1 Synop
3.2 Virtual Consoles and Terminals
3.3 Permissions
3.4 Directory Structure
3.5 Disk Organization
3.6 Mounting and Unmounting File Systems
3.7 Processes
3.8 Daemons, Signals, and Killing Processes
3.9 Shells
3.10 Text Editors
3.11 Devices and Device Nodes
3.12 Binary Formats
3.13 For More Information
```

4 Installing Applications: Packages and Ports

5 The X Window System

II. Common Tasks

6 Desktop Applications

7 Multimedia

8 Configuring the FreeBSD Kernel

9 Printing

10 Linux Binary Compatibility

III. System Administration

11 Configuration and Tuning

12 The FreeBSD Booting Process

13 Users and Basic Account Management

14 Security

15 Jails

16 Mandatory Access Control

17 Security Event Auditing

18 Storage

19 GEOM: Modular Disk Transformation Framework

20 The Vinum Volume Manager

21 Virtualization

22 Localization - I18N/L10N Usage and Setup

23 The Cutting Edge

IV. Network Communication

24 Serial Communications

25 PPP and SLIP

26 Electronic Mail

27 Network Servers

28 Firewalls

29 Advanced Networking

V. Appendices

A. Obtaining FreeBSD

B. Bibliography

C. Resources on the Internet

D. PGP Keys

FreeBSD Glossary
